

Monitoring of the Pesticide Residues at National Level

Schemes Details

Department	Agriculture, Farmers Welfare
Objective	To create a national level repository of pesticide residue analysis data from various departments/institutions engaged in this task by collating/compiling data on the subject.
Purpose	To ensure the safety of horticultural produce by detecting and preventing excessive pesticide residues in fruits, vegetables, and other crops. Supports safe agricultural practices through regular sampling and laboratory analysis.
Benefits	Helps farmers ensure their produce is safe and pesticide residue-free, meeting food safety standards. Promotes awareness and adoption of good agricultural practices to enhance market value and consumer trust.
Eligibility	NA
